

UNI MALE - O2- COUPLING WITH ANGLED HOSE HOLDER

TECHNICAL CHARACTERISTICS

Uni Male oxygen quick coupling complete with angular rubber holder. All flow-meter devices used in oxygen therapy applications can be equipped with the necessary connections to the terminal units or the appropriate accessories for wall or bar mounting.

In the case of pressure reducers, the device provides connections to oxygen cylinders, designed and manufactured in accordance with different national and international standards.

Flow meter couplings are frequently connected and disconnected from the gas distribution system, while pressure reducers must ensure perfect tightness and high safety conditions in use.
