PETZEL WEBBING TO BE WINCHED OUT

PRODUCT CODE

TEC02176 EXTREME BLUE

ELI MINI backpack belongs to the same collection of ELI Backpack but it differs from it for the different shape of the external pocket which is more adherent and incorporated in the central part of the backpack.

The big and compact dimensions make it more storable in the helicopter, ambulances and medical cars.

It is designed in PL 600 material and in Extreme material. The backpack has some measures for the rescuer's comfort such as: padded back, adjustable lumbar support, pair of shoulder straps with soft gel inserts, chest strap for maximum comfort during long journey.

ELI backpack is endowed with a webbing that can be attached to the helicopter certified by PETZEL. It has a capacity exceeding 50 kg. This webbing, together with the sewing system to the body of the backpack, determine its certified winch.

ELI is equipped with double handle for the transport and it has a useful top pocket where to put the medical devices for immediate diagnostic.

Inside the backpack, there are elastic nets that predispose it for the housing of trousse, kits, and materials for the rescue.

High-visibility yellow fluo edgbanding finishes the backpack. The backpack is customizable with writings and logos and it is produced in Italy.
