

HUM AEROCASE DRESSING BAG

TECHNICAL CHARACTERISTICS

DIMENSIONS

HEIGHT:	32 CM
WIDTH:	53 CM
DEPTH:	32 CM
VOLUME:	28 LT
WEIGHT:	1.4 KG

The bag is suited for the storage and transport of medical equipment.

The bag is produced in Extreme material and it is characterized by its durable stable and sturdy construction. Inside the bag there is the chance to change the disposition of the medical devices thanks to the reinforced textile dividers.

The bag is structured with inner compartments, side pockets, front pocket and divided front pocket.

This bag is very versatile because it can be used also with the shoulder straps that are in the pocket on the back of the bag, it can be used also with the additional crossbody or used only by the hands for a major mobility.

The wide space inside the bag houses a lot of facilities; the compartment with the hinge is inside the "opening door". The bag has a structured and practical internal disposition also characterized by the dividers that can be changed as required.

The internal pocket, the side ones and the front one store sturdy elastic straps, furthermore, the inner part is removable.

The reinforced external walls, the fully upholstered design and the bottom protected part offer the maximum protection to the devices inside the bag. The front pocket is divided and it includes the front opening part, different dimensions of dividers and straps useful to house infusion accessories, diagnostic devices.

Last but not least the bag is also tear-resistant and washable.
