 MAX LOAD: 160 KG

CERTIFICATIONS

EN ISO CODE 9999:18.33.12

PRODUCT CODE

TEC07209

Motorized chair with possibility to climb and descend the stairs with minimum effort.

The engine is powered by a 36V battery which ensures power and reliability. The rubber tracks allow excellent grip on most surfaces.

It is extremely comfortable and easy to use, it is able to relieve from efforts the operators of the field who have to carry out various transports daily.

The soft seat ensures the patient a comfortable transport without slipping or instability. The telescopic handle allows the use to anyone, as adjustable in height. The chair is equipped with front telescopic handles to manage the chair at best during the most difficult ascents, where there is always need of a second operator. TLF 21 can be used as a normal sedan thanks to the four increased size wheels and the two front swivel. The chair is also equipped with breaking wheels and elbow rest for greater safety and comfort. A big LCD display shows the battery status both with percentage and with normal bars. On the display there are also the buttons for the ascent and descent, a switch to change the speed of the engine and a button to activate a courtesy light.

The chair can be closed and stowed in the ambulance compartment or on site easily.

As an option, it is possible to equip the holding systems to be mounted in the ambulance.
