This medical device is formed by an inflatable pad, with inflation valve, which fits perfectly to the patient's face by optimizing the administration of anesthetic.

The anesthesia mask is made of phthalate-free PVC material, high transparency and for an optimal view of the patient's ventilation, it is also a safe and easy to use latex free product.

The medical device is characterized by a patented design, with medial sockets that allow perfect manipulation and a safe placement on the patient's face.

It comes in 7 sizes distinguished by different colors to quickly identify the size to be used in different occasions and there are also fastening rings.
