This type of supports immobilize the extremities of the body efficiently. Each splint can be molded to be adjusted to the specific needs of each patient. Furthermore it ensures a high level of rigid support due to the material with which the inner section is made of. Indeed it is realized in neoprene and it is coated in water repellent laminated nylon assembled to a rigid metal slat. A velcro strap allows a quick fixing. It is available in 5 measures or in a bag with a set formed by 5 pieces.
