Compact and practical backpack designed in shaped PL 600. It is resistant and washable.

It is designed and developed for a vertical use so that the backpack doesn't come into touch with agents that can contaminate the backrest and keep clean the clothing of the rescuer. The opening with 2 doors allows to access to the 4 colored bags inside the backpack.

A plastic clip ensures the closure of the backpack for a major safety, in addition there are hinges an velcro material used to secure the 2 parts quickly during the rescue operations.

Outside, in the front of the backpack there are 2 storage pockets with zipper closure; laterally a slim pocket can contain a tablet or accessories.

Padded and adjustable shoulder straps, a side handle for the bag transport and fluo yellow finishes complete the backpack.

It is produced in Italy
