DEPTH: 9 CM

PRODUCT CODE

TEC02163 ACLS BIG BACKPACK

YELLOW EXTREME WITH WITH

FLUORESCENT YELLOW FINISHES

Medical backpack for advanced rescue. ACLS is designed in collaboration with professional emergency service operators.

This backpack allows you to store everything you need for a first aid operation.

The ACLS backpack has been designed to give rescuers the opportunity to operate on the site of the surgery without having to open the backpack completely, but simply using the external pockets for diagnostics and medication.

On the two sides of the backpack there are two pockets that can be opened with a hinged system around the perimeter: the first has been arranged to contain a complete intubation set; the second is used to contain various dressing materials. In the front of the backpack there is a pocket, with zipper closure in which inside you can arrange the principals in an orderly manner.

Also in the front was inserted an additional pocket with zipper closure to access a window for customization.

Backpack made of durable and washable Extreme. The backpack is customizable with logos and writings.

Made in Italy
